CDS® combination orthoses

The CDS® combination orthoses complete the CDS® Portfolio. The simultaneous therapy of the hand and elbow or the ankle and knee allows the efficient treatment of the muscle chains of the upper or lower extremity.

Available in a modular system for the treatment of all sizes.

Pediatrics
Our CDS® range is available in 4 colours and small sizes.
CDS® system hinges

The CDS® system hinges allow for a multitude of creative treatment options. Available in aluminium and steel, the system hinges offer a broad spectrum of opportunities. The rods are available in three different width and with four different anchors.

The alignment kit ensures that the hinges can be positioned correctly.
